Proposal for CPC Funding for TSCG

Project: Complete Fencing Project and Add Walkway around perimeter of TSCG

This project would serve multiple purposes:

- (1) Preserve existing fence (existing fence is at risk from falling branches and encroaching vines)
- (2) Complete existing fence by adding rodent protection to existing deer fencing
- (3) Preserve existing garden by controlling creep of underbrush from the forest edge into the garden area
- (4) Enhance existing garden by increasing sunlight hours
- (5) Add recreational element by creating a walking path around the garden

Project Elements:

- (1) Cut back undergrowth including briars, vines, poison ivy, and other aggressive and invasive plants on both sides of the fence. (Six feet on outside perimeter, two feet on inside perimeter, where needed.)
- (2) Cut back limbs overhanging fence.
- (3) Add metal rodent fencing to bottom of existing deer fence.
- (4) Install 72" landscape fabric to outside perimeter.
- (5) Install 36" landscape fabric to inside perimeter.
- (6) Cover landscape fabric on exterior and interior with 3" of wood chips.
