Re: Scituate Harbor Walk/signage

The Scituate Historical Society is pleased to add its support to the Scituate Harbor Walk concept being proposed by Harbormaster Mark Patterson. It is our understanding the first phase of the project is to install signage along the walkways of Cole Parkway and the Welch Company Marina area. This signage will be of great benefit to Scituate residents and visitors alike and will preserve the rich history of the harbor.

The harbormaster has been working with the society on this signage over the last several months and the text and imagery for the first few signs are now finished. We believe this project meets the requirement of historical preservation under the CPA as defined by the state.

Sincerely,

President
